

# **Meeting on Computational and Analytic Problems in Spectral Theory**

Cardiff School of Computer Science & Informatics, June 6<sup>th</sup>-9<sup>th</sup> 2016

## **Abstract of Talk**

---

### **SPECTRAL BOUNDS FOR NON-SELFADJOINT OPERATORS AND OPERATOR MATRICES**

Christiane Tretter

Universität Bern, Mathematisches Institut (MAI), Sidlerstrasse 5, 3012 Bern, Switzerland

In this talk methods to enclose the spectra of certain classes of non-selfadjoint operators will be presented. Special attention will be paid to operator matrices and to classes of operators that appear frequently in applications.
