

Meeting on Computational and Analytic Problems in Spectral Theory

Cardiff School of Computer Science & Informatics, June 6th-9th 2016

Abstract of Talk

SPECTRAL BOUNDS FOR NON-SELFADJOINT OPERATORS AND OPERATOR MATRICES

Christiane Tretter

Universität Bern, Mathematisches Institut (MAI), Sidlerstrasse 5, 3012 Bern, Switzerland

In this talk methods to enclose the spectra of certain classes of non-selfadjoint operators will be presented. Special attention will be paid to operator matrices and to classes of operators that appear frequently in applications.
