Appendix B: User Stories

User Story	Points
Future (smaller details	
i didio (cindio) dotalio	
Home page carousel scrolls automatically, stops when clicked	1
warn people on sign up that they will also need a Google	
account in order to edit/create notes	0.5
Highlight entity type in activity feed (rather than action?)	0.5
"Notes" instead of "Document" in activity feed	0.5
Bug: Login after signup takes you to signup!	0.5
List of events (on View Subject) should be in date order!	1
Automatically are Following any O/S/E you create	2
Site map?	2
Stored procedure for deleting organizations + their children + activity	3
Page titles more specific, e.g. Wembley FC instead of current Organizations	2
Instead of following Event, have "Attending" (Yes, Maybe, No) similar to Facebook	3
Events have description	1
Link to signup on login page	0.5
Privacy policy, legal disclaimers	2
User profile - allow editing, maybe add some fields like description, website	2
User profile - allow adding links, notes etc?	3
Breadcrumbs displayed across whole site	3
Lists of Events ordered by date, next upcoming one highlighted	2
Links pane for organizations	1
Nicer list of Links	1
Log-in link on doc go screen	0.5
Helper for long descriptions to hide some text	1
Better redirects after links CRUD	2
Users can 'teach' or 'assist' subjects & events	1
Open source credits page	1
Change 'localhost' redirects to dynamic server details	1
Nice buttons with icons for actions instead of blue text links	1
Notes have activity on Go page	2
Explore non-Gdocs silos that have APIs, or maybe categories for links	2
User can delete account	2
User profiles have cleaner public URLs, eg /jambo81	2
Bug: Google account link 'pollutes' user's own Docs Home	2
Future (New Features)	
Can upload docs/pdf	5
User can sign up using Google account	5
Embedded YouTube, SoundCloud?	3
Activity feeds available as RSS	3
Users can report bad users, docs/links (DMCA)	5
Function for calculating time since/until date, returns plain	J

Future (New Dimensions) Student Future (New Dimensions)	Users can follow each other	3
Future (New Dimensions) Future (New Dimensions) Allow uploading of pictures for various entities Can disable & request delete of accidentally created records, e.g. Event when none will actually take place could cause problem! Tags for subjects to group them by course Can view history of entities and roll back changes Get reputation before can chat Some way to use geo-location?? Between the count of their friends from social networks Doc edits show in a user's stream Tive"-ish Gdocs data displayed, eg "last edited" Changing doc title changes it in GDocs, and vice versa Work Completed Change site title to UniNotes instead of UniNot.es Clean up data by renaming bad records with new data Eavicon Only display map if address meets minimum length e.g. 20 characters Test with multiple users simultaneously (in lab) Not tested - hard to test search until Google reindexes page 0.5 Testing issue: links open in same window from activity feed Not tested: name optional for Events as form won't save Testing issue: get errors creating google doc Add real cardiff modules and events for next couple of weeks Style for 404 page in line with rest of site Testing issue: after registering, displaying dashboard without activity gets error Testing issue: after registering, displaying dashboard without activity gets error Release to 'live' 2 Release to 'live' 2 Release to 'live' 2 External links are rel=no follow Limit lists on FP to 100 records Make new front page 1 Improved top bar with only key features listed If no site-wide breadcrumbs, either get working for Events or scrap Not sure calendar is working fully, maybe missing icons for changing date? Make sure add/edit pages look ok after validation fails Less usly index page for organizations, or else scrap altogether Prettier sign-up page, explain changes are public, i.e. appear in Activity feeds 1 users can search Location + map for events

Prettier sign-up page, explain changes are public, i.e. appear in Activity feeds 1 users can search 3 Location + map for events 1	altogether	2
in Activity feeds 1 users can search 3 Location + map for events 1	Prettier sign-up page, explain changes are public, i.e. appear	
Location + map for events 1	in Activity feeds	
	users can search	3
"Follow" becomes "unfollow" where applicable 2	Location + map for events	1
	"Follow" becomes "unfollow" where applicable	2

Recent activity stream for entities	3
profile (View) page for User	3
User dashboard	5
Activities look prettier, have links/buttons	2
Prettier log-in page	0.5
Bug: can't edit doc title	1
Bug: can't edit doc title Bug: can't add subject	1
Changes to entities are tracked	3
Organization website is optional	1
Bug creating Gdoc (check can create with blank title, too)	1
Go screen for Links opens in new tab/window	0.5
Subject, organization name not optional	0.5
Events display nicer	1
Prettier "go" pages	1
Handle bad locations in map	1
Cancel' buttons on forms	1
	1
Add & Edit pages less ugly	2
Calendar picker for events; duration; name optional Remove "textual notes" from events	
	0.5
Notifications display properly with colours	1
Better layout and navigation for HCI	2
Website mock designs	3
Context-sensitive new subject, event	2
Subjects have a description	1
Add tabbed content panes (what if no JS?)	1
View org shows map	2
Design main screens	3
View org has website, descriptions, address	2
Embedded GDocs page for quick viewing	3
Gdocs user can create doc	3
Gdocs user can edit doc	3
User can link account with Google	5
Include Google Analytics	0.5
Add link' process is context-sensitive	2
Users views	2
Interim report	8+
Stop using scaffolds, add style	2
Better views - fewer actions, better lists (links, users)	2
Users can log in/out	3
User can add basic notes about a lecture	1
Links redirect page, 404 for bad links, validation	1
Bug - short names in edit Event don't get saved	1
Logo & site template w/ links at top; homepage	2
Registering users are people, not 'bots	2
Users can 'join' unis, courses and subjects	1
Build basic structure for uni lecture system	2
Generate user personas	2
Learn CakePHP fundamentals	8+
Pick an MVC framework	3
Competitive analysis	3
