Produce initial plan																															
Evaluate existing packages																															
Produce system requirements																															
Research suitable programming languages																															
Research A-level physics courses																															
Design prototype system																															
Implement prototype system																															
Produce interim report																															
Design user interface																															
Implement user interface																															
Test user interface																															
Design simulations																															
Implement simulations																															
Test simulations																															
Acceptance test package																															
Produce final report																															

Milestone / annotation labels:

- First draft 13/10/11
- Final draft 16/10/11
- Functional reqs. 23/10/11
- Non-functional reqs. 30/10/11
- final prog. language 6/11/11
- prototype UI 13/11/11
- prototype sim. 20/11/11
- prototype sim implemented 04/12/11
- Final draft 16/12/11
- Final list of sims. 6/11/11
- prototype UI implemented 23/11/11
- First draft 09/12/11
- UI sketches 19/12/11
- UI pseudocode 05/02/12
- 1st iteration 10/03/12
- 2nd iteration 21/12/12
- 3rd iteration 01/04/12
- Acceptance test results 08/04/12
- First draft 22/04/11
- Final draft 04/05/12
